Brionor Resources Inc.

Notes to the unaudited condensed interim financial statements
For the three months ended November 30, 2014 and November 30, 2013

1. Nature of operations

Brionor Resources Inc. ("Brionor" or the "Company") is incorporated under the *Canada Business Corporations Act*, and is involved in the acquisition, exploration and development of mining properties in Canada and potentially Argentina (see note 7). Substantially all of the Company's efforts are devoted to financing and developing these properties.

Its stock is listed on the TSX Venture Exchange under the symbol BNR. The address of the Company and its registered office is located at 800 Place Victoria, Bureau 3700, Montréal, Québec H4Z 1E9. Its operating office is located at 150 York Street, Suite 410, Toronto, Ontario, M5H 3S5.

2. Going concern

These financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. Accordingly, it does not give effect to adjustments, if any that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities in other than in the normal course of business and at amounts that may differ from those shown in these financial statements.

For the three months ended November 30, 2014, the Company incurred a net loss of \$15,605 (for the three months ended November 30, 2013 - \$9,525), had used cash from operations of \$56,154 (for the three months ended November 30, 2013 - \$1,909), and as at November 30, 2014, had an accumulated deficit of \$4,352,164 (August 31, 2014 - \$4,336,559) and a working capital deficit of \$114,933 (August 31, 2014 - a deficit of \$70,778).

To date there has been no determination whether the Company's interests in mineral exploration properties contain mineral reserves, which are economically recoverable. The business of exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of exploration and evaluation assets and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves and the achievement of profitable operations; and the ability of the Company to raise alternative financing; or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values.

3. Basis of preparation

Statement of compliance

The Company's condensed interim financial statements, including comparatives, have been prepared in accordance with and using accounting policies in full compliance with the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including International Accounting Standards ("IAS") 34, Interim Financial Reporting. The condensed interim financial statements do not include all financial risk management information and disclosures as required in the audited annual financial statements. The condensed interim financial statements should be read in conjunction with the audited annual financial statements for the year ended August 31, 2014, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies and methods of computation remain the same as presented in the audited consolidated financial statements for the year ended August 31, 2014.

During the three months ended November 30, 2014, a loan was provided to Thorsen-Fordyce Merchant Capital Inc. (controlled by Lewis Lawrick) for the amount of \$9,000. The loan is non-interest bearing, unsecured and without fixed repayment terms and was repaid subsequent to November 30, 2014.

8. Financial instrument risk management

a) Fair value of financial instruments

The carrying value of cash, trade and other payables and due to related party approximates fair value due to the short-term nature of these financial instruments.

The Company's financial instruments consist of the following:

Financial assets:	Classification:
Cash	FVTPL
Investment in private company	Available-for-sale
Financial liabilities:	Classification:
Trade and other payables	Other financial liabilities
Due to related party	Other financial liabilities

As of November 30, 2014, except for cash, none of the Company's financial instruments are recorded at fair value in the statement of financial position. Cash is classified as level 1 fair value.

b) Risk management

Credit risk

Credit risk is the risk of loss associated with a counter-party's inability to fulfill its payment obligations. The Company is exposed to credit risk with respect to its cash. To minimize this risk, cash has been placed with major Canadian financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company cannot meet a demand for cash or fund its obligations as they come due. The Company ensures that there is sufficient capital in order to meet annual business requirements, after taking into account administrative, property holding and exploration budgets, against cash. As at November 30, 2014, the Company has \$463 in cash to settle current liabilities of \$128,848. As the Company does not have operating cash flow, the Company has and will continue to rely primarily on equity financing to meet its capital requirements.

9. Capital risk management

The Company's objective when managing capital is to raise sufficient funds to execute its exploration plan and to meet its ongoing administrative costs. At November 30, 2014, the Company's capital consists of equity, which is comprised of share capital, share based payments and deficit, in the amount of \$638,154 (August 31, 2014 - \$653,759).

The properties in which the Company currently has an interest are in the exploration stage; as such, the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company does not have any externally imposed capital requirements or covenants.
